Professional Summary

B.Tech Artificial Intelligence and Data Science student with experience developing AI/ML, full-stack, and cybersecurity applications using Python, Java, JavaScript, React.js, Node.js, and databases. Experienced in applying software engineering principles, machine learning techniques, REST APIs, database technologies, and cybersecurity practices across academic projects and internships. Focused on building reliable software applications and applying technical knowledge to real-world development and engineering challenges.

Technical Skills

- **Programming Languages:** Python, Java, JavaScript
- **Web Development:** HTML5, CSS3, JavaScript, React.js, Node.js, REST APIs, Full-Stack Development
- **Artificial Intelligence and Machine Learning:** Artificial Intelligence, Machine Learning, Deep Learning, Data Science, Model Development, Data Preprocessing, Feature Engineering, Model Evaluation
- **Cybersecurity:** Network Security, Web Security, Penetration Testing, Threat Detection, Phishing Detection, Honeypot, Security Monitoring, Threat Intelligence
- **Databases:** MySQL, MongoDB
- **Developer Tools:** Git, GitHub, Visual Studio Code, Google Colab, Linux, VirtualBox

Projects

ShadowTrap AI – Cyber Deception and Threat Intelligence Engine Python, Cowrie, Cybersecurity, AI

- Developed an AI-assisted cybersecurity monitoring platform using the Cowrie SSH honeypot to capture, monitor, and analyze simulated cyber attacks.
- Implemented attacker behavior analysis, IP intelligence, attack activity monitoring, security event analysis, and automated threat reporting.
- Built security visualization and reporting capabilities to identify attack patterns and suspicious activities.
- Integrated automated Telegram notifications for real-time security alerts and attack events.

GitHub: github.com/Asif-3/ShadowTrap-AI

Phishing Link Blocker Extension – Browser Security Tool JavaScript, HTML, CSS, Cybersecurity

- Developed a browser security extension for real-time URL analysis and phishing threat detection.
- Implemented suspicious URL validation and malicious-link detection logic to identify potentially unsafe websites.
- Designed a lightweight client-side security solution focused on real-time threat detection and browser performance.

GitHub: github.com/Asif-3/Phishing-Link-Blocker-Extension

Experience

Full-Stack Development Intern – Codomax Digital Solutions Jul 2026 – Aug 2026

- Completed a two-week virtual internship focused on full-stack web development and real-world software application development.
- Worked on assigned development tasks while applying software development, debugging, problem-solving, and application development practices.
- Gained practical exposure to frontend and backend development workflows and collaborative development environments.

CUDA Python Intern – ADVI Group of Companies Jun 2025 – Jul 2025

- Worked with CUDA Python and NVIDIA computing platforms for GPU-accelerated application development.
- Explored parallel processing, GPU computing, CUDA programming concepts, and performance optimization techniques.

Artificial Intelligence Intern – Odugaatech Pvt. Ltd. Jan 2025 – Feb 2025

- Gained practical experience with Artificial Intelligence concepts, Python programming, automation workflows, and AI application development.
- Applied programming and problem-solving skills to AI-related development tasks and technical assignments.

Education

Bachelor of Technology (B.Tech) in Artificial Intelligence and Data Science

2023 – 2027

AVS Engineering College, Salem, Tamil Nadu — CGPA: 8.3/10 through 5th Semester

Certifications

- Full Stack Developer Bootcamp – GeeksforGeeks
- Cybersecurity Analyst Job Simulation – Forage (Tata)
- Ethical Hacker – Cisco Networking Academy
- Cloud Technologies – Infosys Springboard
- Data Science and Analytics – HP LIFE
- Career Edge – Young Professional – TCS iON

Languages

English, Tamil, Urdu, Hindi
